

# JEEP JK STOREGATE INSTALLATION INSTRUCTIONS

- 1 Remove tailgate wire cover.

- 2 Line up Storegate in desired location on tailgate. Make sure the area is clean and the Storegate will not interfere with function of the tailgate. Recommended location pictured.

- 3 Identify desired screw positions per location on Storegate in Step 2 and pre-drill holes using 1/8" drill bit.

- 4 Screw Storegate into tailgate using supplied 8-18 self-drilling screws. Tighten screws just enough to compress bulb seal.

- 5 A key is supplied to lock and unlock the latch on the hardcover version; however, the latch may be left unlocked to be operated without the key. A key is not supplied for the netted version.
